

Basketball Central

CSCE 242 - Project Part 1 Proposal

Website Description

Basketball Central will be an engaging website for people who enjoy learning about basketball, from new fans to experienced players. The site will share team information, player profiles, training tips, equipment recommendations, and exciting moments from the sport. Its goal is to make basketball easy to explore through clear writing, strong photos, and an energetic visual design inspired by the court. Visitors will be able to browse content by topic and discover useful information about the game. JavaScript will add an interactive photo slideshow on the home page so visitors can view basketball images and highlights. The design will use basketball orange, dark navy, white, and court-inspired details to give every page a consistent look.

Planned Pages

Page	Content
Home	Welcome message, featured basketball photos, and a JavaScript slideshow.
NBA Teams	Team gallery with facts, locations, colors, and short descriptions.
Player Profiles	Profiles of notable players, including positions, achievements, and photos.
Skills and Training	Tips for dribbling, shooting, passing, defense, and practice routines.
Equipment Guide	Basketball, shoe, hoop, and accessory recommendations for players.

Client-side JavaScript Feature

The finished website will include a home-page slideshow. Visitors will be able to use next and previous buttons to move through basketball images and captions.
